

## OMNINET Benelux gets new management team

### Summary

OMNINET Benelux (OMNINET Technologies NV and OMNINET Netherlands) announces the composition of its new management team following the departure of Guy Werckx, who led the organization for 19 years. The new management team, consisting of two Managing Directors Christophe Faems and Gerben Wartena, will be supported by Harry Kenter and Pieter Vanhees and will be committed to the continued growth and innovation of the company.

### Appointment of new management team

After almost two decades of dedication and leadership at OMNINET Benelux, Guy Werckx has left the organization. Accordingly, the past year has seen close cooperation to ensure a smooth transfer to the new management team.

The new management team, consisting of Christophe Faems and Gerben Wartena as Managing Directors, brings in-depth knowledge of the organization. Christophe will focus on Business & Strategy, while Gerben will focus on Operations. They are supported by Harry Kenter, who serves as Director Netherlands, and Pieter Vanhees, who assumes the role of Sales Director. Their combined experience, expertise and dedication to the company will further drive the ongoing development and expansion of OMNINET Benelux.

“It is with enthusiasm that we accept the challenge of leading OMNINET to new heights in the Benelux,” stated Christophe Faems. “With our long-term commitment within the organization, we are determined to build on the solid foundation that Guy has laid. Our goal is to consolidate and strengthen our position in the Enterprise Service Management and GRC (Governance, Risk & Compliance) solutions market based on OMNITRACKER solutions combined with our wide range of services.”

The transition to the new leadership team marks an exciting new chapter for OMNINET Benelux, with innovation and customer focus remaining central.

### About OMNINET

OMNINET, headquartered in Eckental near Nuremberg, Germany, and with other national offices and international subsidiaries, is one of the market leaders in business process software, particularly in IT and Enterprise Service Management. Its product portfolio ranges from a highly flexible OMNITRACKER platform for the digitization and automation of business processes to BI tools and cloud or on-premise based solutions for service management.
